Aurora Labs Annual Report 2025

Performance, products, and strategic direction for fiscal year 2025.

1. Executive Summary

Aurora Labs is a robotics company founded in 2018 and headquartered in Zurich, Switzerland. The company specializes in autonomous mobile robots for warehouse logistics.

In 2025, revenue grew 42 percent year-over-year to 187 million USD, up from 132 million USD in 2024. The company employs 612 people across six offices worldwide.

Key milestones in 2025 included the launch of the Helios-3 autonomous forklift, the opening of a new manufacturing facility in Munich, and a partnership with Deutsche Post for last-mile delivery pilots.

2. Products

Aurora Labs offers three product lines:

- Helios series: Autonomous forklifts for warehouse operations. The latest model, Helios-3, was released in March 2025 and can lift up to 2,500 kilograms.
- Boreas series: Outdoor delivery robots used by postal and logistics companies. Boreas units have logged over 4 million autonomous kilometers since launch.
- Nimbus SDK: A software platform that allows third parties to integrate Aurora perception and planning stack into their own vehicles. Nimbus is licensed to seven OEMs as of December 2025.

3. Financial Highlights

Revenue: 187 million USD (2025), 132 million USD (2024).
Gross margin: 58 percent, up from 51 percent in 2024.
Research and Development spending: 41 million USD, representing 22 percent of revenue.
Cash on hand at year end: 96 million USD.

4. Strategic Direction

In 2026, Aurora Labs plans to expand into the North American market with a new office in Austin, Texas. The company also intends to double R and D headcount and accelerate the Boreas series roadmap.
